**Securing Smiles
Insuring Joys ...**

The more advanced technology we use, the simpler your life gets.
Digital Dreams is one such hi-tech platform that integrates various communication, security and management facets on to one base.

DIGITAL DREAMS INCORPORATES

- Building Intercom Security System
- Video Apartment Communication System
- Society Management system
 - Society Lighting Management
 - Guard Patrol System

Digital Dreams acts as the backbone for all the above systems and more.

**Dreams blossom,
when the mind
feels protected.**

HYBRID CONSTRUCTION VIDEO ENABLED

Every need is unique in nature and therefore needs a solution that's best suited to answer it. Our design brief is at all times open to specific customer needs. Which is why we deliver solutions that meet your need to the fullest.

Our digital technology expertise makes it possible to connect.

A Basic Telephone Handset

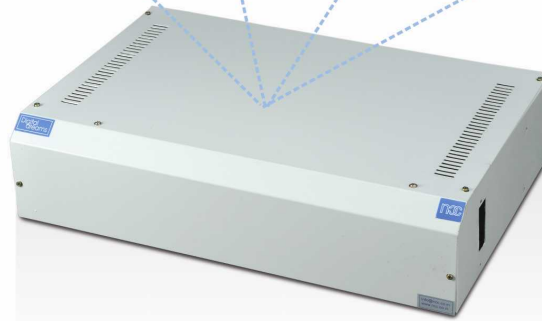

A Telephone with Display CLI

A Vision Terminal Hands Free

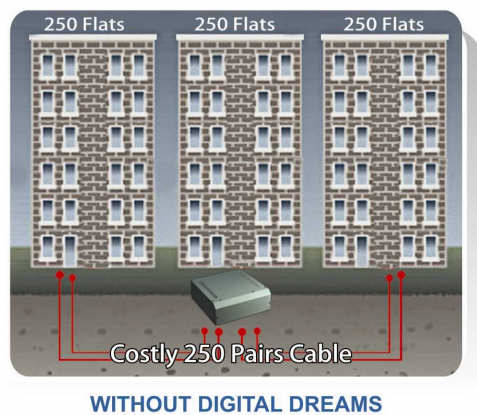

A Vision Terminal with Handset

We use tomorrow's
technology for
a better today.

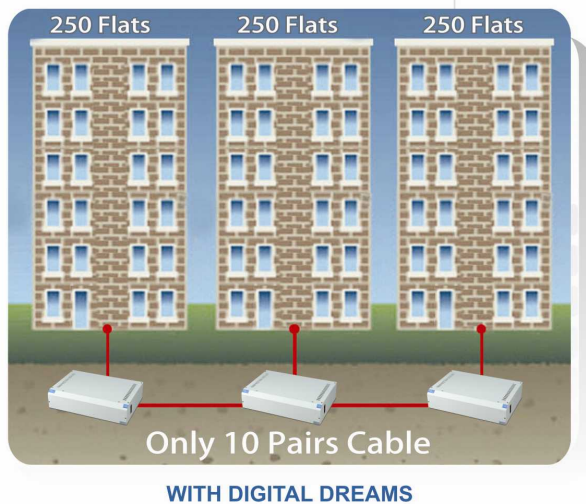

ARCHITECTURE FOR SUPERIOR DIGITAL CONNECTIVITY

The Digital Dreams platform is designed with Multi Microcontroller environment featuring distributed architecture and digital connectivity. The use of **N1 Technology** allows you to divide the entire system into smaller modules as per the premises. **This ends up cutting down otherwise huge wiring costs.**

Furthermore, **N1 Technology** makes the entire system transparent both in functionality as well as in programming it as one unit. A unit that is actually divided into smaller units. What's more, the system is fully **expandable up to any size and capacity.**

You can expand as and when required. it without having to change a thing.

FEATURES :

There's more

-  Interactive Voice Response Systems (IVRS).
-  Intercom facility.
-  HOTLINE to Security extension.
-  Automatic call booking on the security extension (In case extension is busy).
-  Super Auto Call back.
-  5 Party Conference facility.
-  Talking Caller Line Identification
-  Voice Confirmation on last call received.
-  Extension to Extension calling with Restriction / Do Not Disturb / Call blocking.

TUNEFUL CALLS

It is amazing what all you can do with caller tunes. From announcements to mass messaging, this media vehicle carries immense potential. You can set your Caller Tune on Intercom. So be it playing music or sharing information, you can do everything on Intercom. This is a one-of-its-kind feature in India.

MACRO SOCIETY ADVANTAGES

You can now enjoy a host of benefits, both for the Society and on an individual basis.

Meeting Call

Have a teleconference with all committee members or all the extension users of the society at one time. Making meeting calls was never so easy.

Time Alarm

Set your alarm time. The Voice Terminal gives time voice confirmation along with a pleasing melody. Wake up with a smile. This standard alarm is available on all phones.

Vendor Call

It informs all extension users about the arrival of vendors / service providers like vegetable vendors, electrician, plumber, intercom service engineer etc. With a corresponding voice message. It is as good as having a personal assistant.

Paging Port

It enables you to make an announcement of the central paging system. Be sure to be heard.

Talking Caller Line Identification

It gives you voice confirmation about the last received call.

Programmable Passage Light Controller

Controls ON/OFF switching of the common passage or building lights. The system supports 1 dry contact which in turn controls 1 zone. How's that for power saving!

Message Broadcasting

Facilitates an announcement of any field recorded message to be made to all the extension users prior to giving the system dial tone. Keep everyone informed.

Reminder Call

It facilitates each extension user to define 5 different timings to set for the reminder on an everyday basis. Time management just got better.

Panic Button / Code

Pressing the panic button or code will notify a situation of panic automatically switching on the emergency siren at the security. The number of the extension will be displayed on the digital unit. Keep a check on emergencies with ease.

Security Alert Call

Gives an alert ring on all extensions in case a panic button or code is pressed by the security. Alert everyone at one go.

Multiple security Group

Up to 65 security Extensions groups can be programmed.

MACRO SOCIETY ADVANTAGES

WATCH DOG :

At night a 'Jaagtey Raho' call will be given to a security extension, every 30 minutes. The security personnel has to acknowledge this call. All unanswered calls will be stored in the memory, the data of which can be accessed via serial port. Double check your security measures.

DIGITAL DISPLAY UNIT :

A visual Display unit at the security which indicates current time and Incoming Call Number. This has an Additional Hooter attached which rings in case of panic situations.

ADDITIONAL FEATURES OF THE DISPLAY INCLUDE :

- Last Five Calls.
- Last Five Panic Calls.
- Multiple systems connectivity on a single system.

Digital Display Unit (Big - 3.5" Size)

Digital Display Unit (Small - 1" Size)

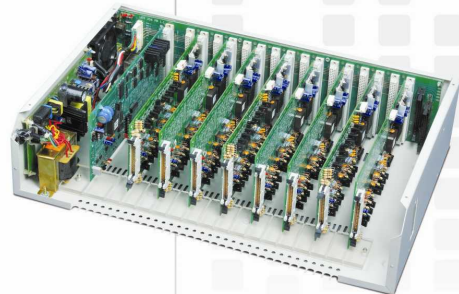

TECHNICAL SPECIFICATIONS
